

## Food Texture Tests

### TEST

- Puncture
- Shearing
- Bulk analysis
- Penetration
- Snapping
- Tension
- Compression
- Extrusion

on a variety of foods...

### SOLUTION

Mecmesin, as a distributor of Food Technology Corporation (FTC), a leading manufacturer of food texture analysers, offers a variety of affordable force & torque measurement systems for quality control and production line testing of finished foods, their intermediate components and functional ingredients, as well as, their packaging.

FTC fixtures enable producers to make food texture assessments, replicating conditions, which are representative of the consumer as they would handle the food.

For unique applications, a bespoke service is available to design and manufacture specialised equipment and accessories to guarantee accurate results!
